

EduAI Assistant SDG 4: Quality Education

Artificial Intelligence Final Project Report

1. Introduction

Education remains inaccessible for many learners. EduAI Assistant is an AI-powered platform designed to provide personalized learning support.

2. Selected SDG and Reason

SDG 4 focuses on ensuring inclusive and equitable quality education. This project was selected because personalized learning can improve educational outcomes.

3. Problem Statement

Students often lack access to personalized tutoring, instant feedback, and structured study plans.

4. Proposed Solution

EduAI Assistant provides AI tutoring, quiz generation, study planning, and resource recommendations.

5. System Features

AI Tutor Quiz Generator Study Planner Learning Resources Progress Tracking

6. Technology Stack

Python, Streamlit, Generative AI APIs, GitHub, VS Code.

7. Screenshots and Explanation

Insert screenshots of Home Page, AI Tutor, Quiz Generator, Study Planner, and Resources Page here with descriptions.

8. Future Scope

Future enhancements include voice interaction, multilingual support, mobile applications, and analytics dashboards.

9. Conclusion

EduAI Assistant demonstrates how AI can support SDG 4 by providing accessible, personalized educational assistance.
